

CHETAN SRIKANT MANDIGA

+91 9989714684 ♦ Hyderabad, Telangana, India

chetansrikantmandiga@gmail.com ♦ [LinkedIn/Chetan-Srikant](#) ♦ [Github/ChetanSrikant](#)

OBJECTIVE

Systems Engineer with hands-on experience in **Active Directory, Azure AD, and enterprise identity systems**, with a strong foundation in **AI-driven applications, full-stack development, and data systems**. Experienced in building real-world AI solutions and working with production infrastructure. Interested in **AI system engineering, scalable platforms, and cloud-based AI deployment..**

EDUCATION

B.Tech in Computer Science and Engineering , BML Munjal University	2021 - 2025
Minor in Entrepreneurship , BML Munjal University	2023 - 2025

SKILLS

Languages:	Python, Java, C++, JavaScript
Web & Frameworks:	React.js, Node.js, Next.js
Databases:	MongoDB, MySQL
Cloud & Systems:	Azure AD, Active Directory
Tools:	Git, REST APIs, Firebase
Core Concepts:	Data Structures, Algorithms, OOP, System Design Basics

EXPERIENCE

Systems Engineer – IAM Cloud (Active Directory Azure) HCLTech	August 2025 - Present <i>Noida, India</i>
---	--

- Managed Active Directory and Azure AD environments, supporting user provisioning, access control, and hybrid identity integration in an enterprise setup.
- Troubleshoot and resolved authentication, account lockout, and directory synchronization issues, ensuring high availability of identity systems in a production environment.

Full Stack Data Scientist Innodatatics	March 2025 - August 2025 <i>Hyderabad, India</i>
--	---

- Designed and developed two AI-driven data platforms: an enterprise forecasting dashboard for a private client and a public transport demand prediction system for TGSRTC.
- Built interactive dashboards with integrated AI forecasting models and a custom chatbot assistant, applying CRISP-ML(Q) methodology and Git-based CI workflows for agile delivery.

Project Intern DRDO (Defence Research and Development Organization)	May 2023 – July 2023 <i>Hyderabad, India</i>
---	---

- Designed and implemented GUIs using Tkinter for efficient device communication over the RS-422 protocol.
- Streamlined workflows and reduced communication errors, enhancing operational efficiency.

PROJECTS

ZAP – Ride-Hailing Platform	2025
- Developed a distributed ride-hailing platform with robust user authentication, real-time vehicle tracking, and dynamic fare estimation.	
- Integrated Google Maps API and Google Auth API for secure and precise services.	

Driver Drowsiness Detection System	2024
- Developed a real-time computer vision system using OpenCV and Python to detect driver drowsiness through eye	

aspect ratio and facial landmarks - Implemented alert mechanisms to notify users upon detecting fatigue, improving safety in simulated environments - Optimized model performance for real-time inference and accuracy

AI Chatbot (NLP-Based Assistant)

2024

- Built an AI chatbot using **Python and NLP techniques / LLM APIs** to handle user queries and generate contextual responses - Designed backend logic and API integration to process inputs and return dynamic responses
- Demonstrated understanding of **AI inference workflows and conversational systems**

LOOP Chat App – Real-time Messaging Platform

2024

- Engineered a full-stack real-time messaging platform using React and Firebase and implemented real-time database management and user authentication.
- Designed a responsive UI for consistent performance across devices.

Identifying Creditworthy Borrowers

2022

- Built and deployed a machine learning model using Streamlit to predict borrower risk from LendingClub loan data.
- Implemented feature engineering and interactive visualisations with Python, pandas, and seaborn.

EXTRA-CURRICULAR ACTIVITIES

- Winner, AI4TG Grand Challenge (Government of Telangana): Developed an impactful AI solution for optimizing public transport utilization.
